Date: May 15, 1959

COORDINATING COMMITTEE

MEMORANDUM BY THE UNITED STATES DELEGATION

Concerning

EXPORT OF A TAPE RECORDER TO POLAND (IL 1572)

The United States Delegation requests approval for the export to Poland under the special Polish policy of one Ampex tape recorder valued at \$425.

The ultimate end-user is to be the Institute of Agriculture, Warsaw which wishes to use the equipment for the laboratory study of the effect of toxic substances on insects. The recorder is to be procured under the Rockefeller Foundation Science Program and replaces a non-embargoed type previously specified in the Program submitted to United States authorities. The change to the present instrument was recommended to the Rockefeller Foundation by the University of Minnesota.

The usual guarantees against re-export have been received.

In view of the previous approval in principle given the Rockefeller Foundation Program by the Committee and the civilian scientific use to which the instrument is intended, the United States hopes the Committee will be able to approve this export, which the United States authorities consider reasonable and necessary to the Polish civilian economy.
